

who we are

hi. nice to meet you.

Thanks for stopping by! We're thrilled to be here because we *know we can make a difference* in your organization.

Our approach is simple and straightforward: Build innovative, effective search engine optimization campaigns that follow an ethical road map to success. We help solve problems, and give you that competitive advantage. We'd love to see you break free from the "paralysis by analysis" syndrome of today by simplifying your marketing goals. Our vision is to become your trusted resource for fresh online marketing ideas and solutions that will help you continually evolve and succeed.

We think different because we *are different, and we get things done.*

what we do

Yep. We can do that.

- One of the coolest things you'll learn about The Search Engine Pros is that we're an idea company, and we thrive in coming up with innovative web marketing ideas for our clients. You'll never hear us say, "No can do" because we've established ourselves as a custom seo and web marketing shop who pretty much welcomes any challenge, and you'll never see us give up that easily
- So feel free to bring your wild ideas to us and we might just surprise you. We take full advantage of cutting-edge stuff out there, but we're also big advocates of building and innovating in-house.

how we're different

Innovation not complication

- First and foremost we start by assessing your goals, and putting them into perspective. To use an old cliché, We are all about quality, not quantity. More value is placed on a job well done with a smaller number of clients, rather than sacrificing attention to detail by accepting too many projects.
- We are Santa Barbara's premier search engine optimization, internet marketing, web design and development company. We've harnessed some of the brightest technical talent and combined it with proven processes and good business sense to deliver solutions that meet the needs of customers worldwide.
- Our ability to establish and maintain long-term relationships with customers depends on the value we deliver. That value comes from being a company that:
 - * **Understands your business initiatives and markets**
 - * **Has command of the technologies supporting your initiatives**
 - * **Manages projects reliably**
 - * **Communicates effectively**
 - * **Delivers solutions quickly, according to specifications and at the right price**
